

Maternal Resuscitation

Join us to review the normal physiologic changes related to pregnancy and how these changes may increase the risk for a cardiac event. Discuss the most probable causes for maternal arrest, assessment strategies to identify critical clinical situations, and modifications of resuscitation required by pregnant and postpartum women. Experience hands-on simulation to practice skills, teamwork and critical thinking with maternal resuscitation scenarios.

Workshop details

Date: Friday, May 1, 2020

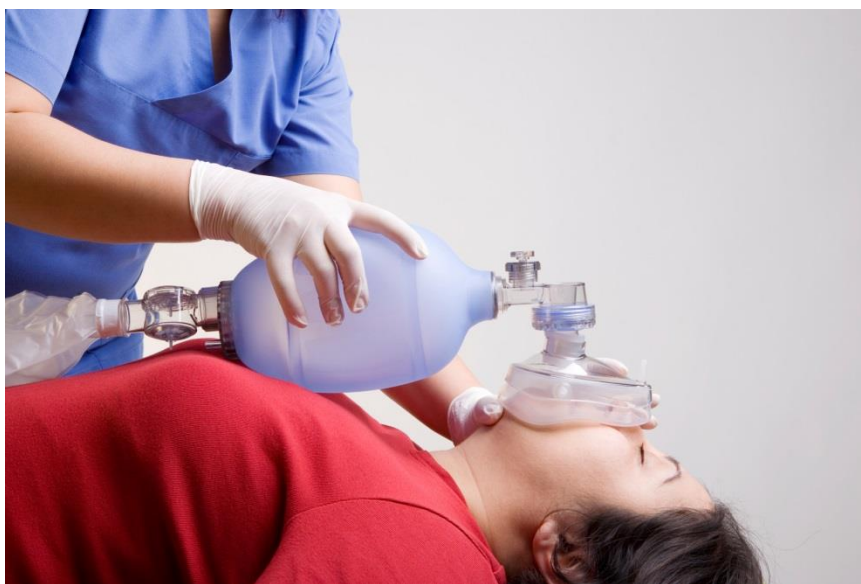

Registration: 8:30 AM

Workshop: 9:00 AM – 3:30 PM

Location: Exeter Hospital
4 Alumni Drive
Exeter, NH 03833
